

Instructions for completing e-assessments for final works

We recommend that you use one of the following applications to fill in the forms correctly:

Adobe Acrobat Reader DC – standard and most used PDF document browsing app available for free here: <https://get.adobe.com/sk/reader>

Microsoft Edge – standard browser of Windows 10 operating system, but it can also be used on Apple devices (Mac OS), iPhone (iOS), or Android. If you do not have it installed, you can download and install it here: <https://www.microsoft.com/sk-sk/edge>

Google Chrome – free internet browser with built-in PDF document reader, you can download and install it here: https://www.google.com/intl/sk_sk/chrome

The form automatically adds points for each part of the assessment. However, this feature is not fully compatible with all browsers or PDF document readers. For example, **in Mozilla Firefox the add-on function does not work**, so we do not recommend using it. If you are using another PDF document browser, it is possible (and likely) that some of the functions of the forms will not work properly – e.g. saving or printing a properly completed form, adding points, etc., so we recommend you use one of the above-mentioned applications. If any of the links provided to the website do not work, please use the **Google** search engine, which will find the current internet links.
